

Logical

Print & Document Solutions

The **General Data Protection Regulation** (GDPR) comes into effect on the 25th May 2018, creating a new benchmark for data law around the world

MFP's are now a vital part of most organisations' document workflows and business processes, so they are a potential weak spot with regards to information and network security.

We offer a comprehensive range of advanced security solutions, including **DATA SECURITY KITS**, which are designed to protect your confidential information while it is being printed, copied, scanned and faxed or transmitted over your network.

In addition, Sharp was the world's first MFP manufacturer to address security in digital imaging, receiving the first Common Criteria validation for an MFP in 2001 and being the first to achieve an EAL 4 rating for a **DATA SECURITY KIT**.

SHARP

UTAX

SPECIAL OFFER

From now until 9th May, when you invest in an A3 Colour Copier from Logical, we'll include a **DATA SECURITY KIT** for **FREE!**
